Legacy of International Astronautical Congress 2017

- A growing interest in space matters on the part of governments, the media and the general public
- The industry and educational initiatives that originated at or were inspired by attendance at the IAC
- The potential national benefits flowing from the commitment of the Commonwealth Government to establish a space agency.

SIAA Plans for 2018 include:

- Response to Commonwealth Space Agency plans
- Space Capability Database update
- National space industry events
- Continuing policy and regulatory development
- Grants for deserving industry development causes

Australia in Space
